## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Species I, claim 1, represented in figure 2, in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 2 – 9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Aoki et al. (JPPAT 07036061A, Aoki).

Art Unit: 2815

Aoki discloses in figures 1 – 3 a liquid crystal (LCD) device comprising a TFT panel, a counter panel and liquid crystal disposed therebetween. Aoki discloses in figures 1 – 3 a transparent substrate (10). Aoki discloses in figures 1 – 3 a plurality of scanning lines (1) overlaying the transparent substrate to extend in a row direction. Aoki discloses in figures 1 – 3 a plurality of signal lines (2) overlying the transparent substrate to extend in a column direction. Aoki discloses in figures 1 – 3 a plurality of common lines (5) each corresponding to one of the scanning lines to extend in the row direction parallel to the one of the scanning lines, the scanning lines and the common lines are formed in a single layer (11). Aoki discloses in figures 1 – 3 an array of pixels each disposed at an intersection between one of the scanning lines and one of the signal lines, the common lines having extending portions (H) extending outside an area fore the array of pixels. Aoki discloses in figures 1 – 3 a coupling line (7) coupling the extending portions together and formed in the single layer.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamashita et al., Tanaka et al., and Inoue all disclose LCDs with coupling lines.
